Automation Made Easy (“AME”) is a Management & Design company whose goal is to design quality equipment to support your manufacturing needs. With “AME”, you are free to choose the assistance level you need to supplement the abilities and workloads of your in-house staff: from help with design to complete project management and system acquisition.

Too many machines are designed solely for the function of producing the product without concern for operator ergonomics, maintenance, durability, and the real cost of the equipment once operating efficiencies are taken into account. “AME” looks at the entire picture, taking into account all of these factors and more. We believe that in the long term, designing for quality reduces costs and increases profitability.

Our Services Include

Consulting

(Feasibility Studies, Concepts, Specifications, Cost Estimates, Prototyping)

“AME” can help you evaluate your manufacturing needs: from Ergonomic Workstations, to Special Machines, to Fully Automated Turnkey Production Lines.

Project Management

(Project Supervision, Schedules, Reviews, Equipment Acquisitions, Installation Supervision)

“AME” can manage your entire project from start to finish or any portion thereof. Even on projects “AME” is not directly involved with, “AME” can assist you with the often-overlooked detailed evaluation of concepts and quotes, and detailed reviews of the design, build, and acceptance of equipment you are acquiring from other sources. The overlooked details are often the items that determine the success or failure of a project.

Design

(Mechanical, Electrical - Machine Control, Pneumatic, Hydraulic)

“AME” can handle any aspect of your equipment design: independently or as part of your design team. For a great machine, you need a great design!

Programming

(PLCs, HMIs, Computers, Robots, Motion Control)

“AME” can handle any aspect of your equipment programming: independently or as part of your team. Good programming can greatly improve the performance of your machine!

Troubleshooting

If you have a machine that that is not meeting your expectations, whether on your floor or currently under construction on an OEM’s floor, “AME” can help you evaluate the problem and offer you solutions.

Take “AME” and NAIL your next project!

Automation Made Easy, LLC

“AME” personnel have vast experience with a variety of equipment in a variety of industries. This gives “AME” the ability to draw from that vast pool of experience and apply that knowledge to your applications.

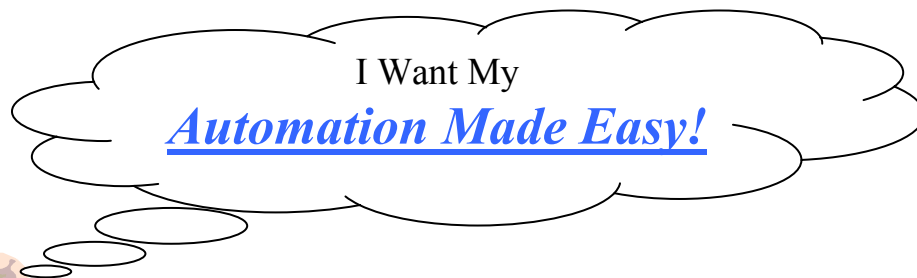

Typical Equipment

Assembly Equipment	Automated Inspection Equipment
Ergonomic Workstations	Machining Centers
Material Handling Equipment	Packaging Equipment
Palletizing Equipment	Printers / Labelers
Robotic Work Cells	Web-Handling Equipment
Prototypes	And the list goes on . . .

Typical Industries

Aeronautical Industry	Automotive Industry
Food Industry	Medical Industry
Pharmaceutical Industry	Plastic Film Industry
Printing Industry	Web-Handling Industry
And more . . .	

We delight in taking on challenging projects!

Take **“AME”** and **NAIL** your next project!
